Field, Street, and Ice Hockey! Force, Motion, Velocity, and Acceleration! In this book, readers gain access to real scientific data pertaining to the science of hockey, promoting graph-reading, comparison, contrast, and calculation skills. Graphs show data from the following scientific instruments: Video Analysis Dual-Range Force Meter This book allows readers to analyze real data without purchasing expensive lab equipment. Graphs show the motion of hockey balls and pucks as they move across a variety of surfaces. Data are presented for a field hockey ball, two street hockey balls (high density and low density), an official ice hockey puck, a practice ice hockey puck, and an air hockey table puck. Surfaces include carpet, wood, ice, synthetic ice, and air table with and without the friction-reducing effects of air. Additional coordinated graphs show the impact forces associated with movement over a flat surface, as well as the forces required to push a puck continuously for a specific distance. Graphs of collisions between moving objects (ballspucks) and a wood sideboard are also included. These data can be used...
